**Subject:** last opportunity for review of the CZARA decision rationale document and the response to comments document

Hey guys.

First of all, thanks for all of your input in drafting the CZARA rationale and/or the response to comments documents that, in part, address the roads, landslides and riparian issues. These could not have been completed without you. You guys are great!

The complete (covering all of the issues) draft decision document and the complete draft response to comments document are attached. Between now and November 7<sup>th</sup>, upper managers (Christine Psyk's level) and attorneys from NOAA and EPA will be reviewing both documents and providing comments back to the CZARA core team. At the same time, the "issue specific" technical teams have one more opportunity to provide additional input. If you all have time, I would appreciate your comments on both documents. You are free to comment on any or all parts of both documents, not just the issues you worked on. We just need your comments by COB, November 7<sup>th</sup>. The CZARA core team will compile the comments and revise the documents as appropriate. Our goal is to achieve "pens down" status before Thanksgiving. Please let me know if you think you will have time to help on this review.

Work is also underway on the communication strategies and briefings for both agencies to set the stages for the final decision.

Again, thanks so much for all of your input. Give me a call if you have any questions.

Alan
